THE UNIVERSITY is the rear guard and the advance agent of society. It lives in the past, the present and the future. It is the storehouse of knowledge; it draws upon this depository to throw light upon the present; it prepares people to live and make a living in the world of today; and it should take the lead in expanding the intellectual horizons and the scientific frontiers, thus helping mankind to go forward—always toward the promise of a better tomorrow.

From “The State and the University”
the inaugural address of
President Wilson H. Elkins,

THE SCHOOL

The Summer School of the University of Maryland at College Park provides the opportunity for year-round study and research. For this purpose, the University is offering an extensive and varied program of undergraduate and graduate courses, as well as lectures, special institutes and workshops for educators. More than 6,000 students from the 50 states and approximately 55 foreign countries are expected to attend the University during the eight-week period, June 22 through August 14, within which are included eight-week and six-week courses, and workshops and institutes of varying length.

Through its summer program, the University makes its resources available to students desiring a general education, and to those students interested in preparing for professional, scientific and technical areas for which it offers collegiate and graduate level work.

The courses of the Summer School are the regular courses of the University; each college on the College Park campus is represented in the School's offerings. All courses are equivalent to those offered in the academic year in content, method and credit, and are taught by members of the regular faculty or visiting lecturers of outstanding ability. Many departments within the various colleges have increased their course offerings for the 1964 Summer School.

The 1964 Summer School has been planned to:

1. Provide students enrolled during the academic year an opportunity to continue their studies during the summer.
2. Enable students to accelerate their programs of study.
3. Enable students to remove deficiencies.
4. Provide educational opportunities to visiting students pursuing degrees at other institutions.
5. Provide in-service education to teachers and school administrators.
6. Provide a variety of enrichment experience opportunities in areas of specialization.

RECREATIONAL, SOCIAL AND CULTURAL ACTIVITIES

A Recreation and Social Activities Committee, working with a full-time Summer Director of Recreation, has planned a varied program of activities of interest to students attending the University during the summer session. University swimming pools will be open with scheduled hours each afternoon and evening. There will be softball, tennis, and golf tournaments, a summer theater workshop, and a summer chorus in which students are invited to participate.

ACADEMIC INFORMATION

Planned activities will include round and square dancing, outdoor movies, Chapel vesper services, band concerts, watermelon feasts, guided tours of Washington, and other social functions. The Summer Recreation Director will be available to counsel with groups planning picnics or other events.

ACADEMIC INFORMATION

TERMS OF ADMISSION

All Summer School students new to the University must be officially admitted. *This applies to all non-degree as well as degree candidates.*

UNDERGRADUATE AND SPECIAL STUDENTS

A student seeking a bachelor's degree in any undergraduate college, who has not been previously admitted to the University, must file application with the Director of Admissions *not later than the end of the first week in June, 1964.*

A student who already has a bachelor's degree and who either does not wish graduate credit or does not meet requirements for admission to the Graduate School may be admitted to the undergraduate college consistent with his major interests, as a Special Student. He should be admitted to the University through the Director of Admissions *no later than the end of the first week in June, 1964.* Credit so obtained through the College of Education is ordinarily accepted for renewal of teaching certificate. A Special Student may take upper division (100, but not 200 or 300 level) courses.

GRADUATE STUDENTS

Application for admission to the Graduate School, and all supporting academic records, must be in the office of the Dean of the Graduate School by June 1, 1964.

Transfer Credit: To another institution. The student who wishes to transfer credit to another institution should submit an application on which he writes "For Transfer Only." Along with the application he should submit a letter from the graduate dean of the institution in which he is enrolled as a degree student, to the Dean of the Graduate School, University of Maryland, requesting permission to take a limited amount of work.

Transfer Credit: To the University of Maryland. Credit not to exceed six semester hours for course work at other recognized institutions may be applied towards the master's degree, only when such course work has been taken after the student has been admitted to the University of Maryland Graduate School. Before taking course work for transfer the student must have the approval of his adviser, the head of his major department, and

the Dean of the Graduate School. Normally, approval may be given only for courses which are not offered by the University of Maryland during the period of the student's attendance. The request for transfer of credit shall be submitted to the Graduate Council for approval when the student applies for admission to candidacy. The candidate is subject to final examination by this institution in all work offered for the degree.

Special Non-Degree Credit. The student who already has a master's degree and does not wish to pursue a doctoral program may submit an application marked "Non-Degree" and along with it, official transcript of all previous undergraduate and graduate study. If the student later desires to embark on a doctoral program, the credit earned in Special Non-Degree status may, at the discretion of the major adviser, be used in a doctoral program.

Degree Credit. The student who wishes to pursue either a master's or doctoral program must submit, along with his application, official transcripts of all work taken in institutions of higher education. The applicant is subject to admission requirements of the Graduate School and of the department in which he hopes to pursue his graduate work.

ACADEMIC CREDIT

The semester hour is the unit of credit. During the summer session a course meeting five times a week for six weeks or four times a week for eight weeks, each requiring the normal amount of outside work, is given a weight of three semester hours. Each class period is 80 minutes in length.

Students who are matriculated as candidates for degrees will be given credit toward the appropriate degree for satisfactory completion of courses. All courses offered in the Summer School are creditable toward the appropriate degree provided they are included in the student's program as planned with his adviser.

All students will receive an official grade report specifying the amount and quality of work completed.

MARKING SYSTEM

The following symbols are used for marks: A, B, C, and D—passing; F—Failure; I—Incomplete. Mark "A" denotes superior scholarship; mark "B," good scholarship; mark "C," fair scholarship; and "D," passing scholarship. The mark of "I" (incomplete) is exceptional. Complete regulations governing marks are printed in *University General and Academic Regulations*.

MAXIMUM LOAD

Undergraduates:

Undergraduate students may earn credit at the discretion of their respective advisers in accordance with the following guide lines:

ACADEMIC INFORMATION

Students enrolled only in courses of 8-week duration may earn from 8-10 credits.

Students enrolled only in courses of 6-week duration may earn from 6-8 credits.

Students enrolled in combinations of 6 and 8-week courses may earn 7-9 credits.

Graduate:

Students enrolled only in courses of 8-week duration may earn a maximum of 8 credits.

Students enrolled only in courses of 6-week duration may earn a maximum of 6 credits.

Students enrolled in combinations of 6 and 8-week courses may earn a maximum of 7 credits.

SUMMER GRADUATE WORK

Master's degrees are offered through the Graduate School as follows: Master of Arts, Master of Science, Master of Arts in American Civilization, Master of Education, Master of Business Administration, and Master of Music.

Doctor's degrees offered through the Graduate School are as follows: Doctor of Philosophy and Doctor of Education.

Graduate work in the Summer School may be counted as residence toward a master's degree or Doctor of Education degree. A full year of residence or the equivalent is the minimum requirement for each degree.

The requirements for any of the above degrees may be obtained upon request from the Graduate School.

Special regulations governing graduate work in Education and supplementing the statements contained in the Graduate School Announcements are available in duplicated form and may be obtained from the College of Education. Each graduate student in Education should have a copy. Students seeking the master's degree as a qualification for a certificate issued by the Maryland State Department of Education or any other certifying agency should consult the appropriate bulletin for specific requirements. Advisers will assist students in planning to meet such requirements.

All students desiring graduate credit, whether for meeting degree requirements, for transfer to another institution, or for any other purpose, must be regularly matriculated and registered in the Graduate School.

CANDIDATES FOR DEGREES

All students who expect to complete requirements for degrees during the

summer session should make application for diplomas at the office of the Registrar during the first two weeks of the summer session.

THE PROGRAM IN AMERICAN CIVILIZATION

The University considers that it is important for every student to achieve an appreciative understanding of the country, its history and its culture. It has therefore established a comprehensive program in American civilization. This program is also designed to provide the student with a general educational background.

All students receiving a baccalaureate degree from the University of Maryland must (except as specific exceptions are noted in printed curricula) obtain 24 semester hours of credit in the lower division courses of the American Civilization Program. Although the courses in the Program are prescribed generally, some choice is permitted, especially for students who demonstrate in classification tests good previous preparation in one or more of the required subjects.

The 24 semester hours in American civilization are as follows:

1. English (12 hours, Eng. 1, 2 and 3, 4), American history (6 hours, H. 5, 6), and American government (3 hours, G. & P. 1) are required subjects; however, students who qualify in one, two or all three of these areas by means of University administered tests will substitute certain elective courses. Through such testing a student may be released from 3 hours of English (9 hours would remain an absolute requirement), 3 hours of history (3 hours remaining as an absolute requirement), and 3 hours of American government. Students released from 3 hours of English will take Eng. 21 instead of Eng. 1 and 2. Those released from 3 hours in history will take one lower-division history course instead of H. 5 and 6. Students who have been exempted from courses in English, American history, or American government may not take such courses for credit.

2. For the 3 additional hours of the 24 hours required the student elects one course from the following group (Elective Group I):

Econ. 37, Fundamentals of Economics (Not open to freshmen; students who may wish to take additional courses in economics should substitute Econ. 31 for Econ. 37)

Phil. 1, Philosophy for Modern Man

DEFINITION OF RESIDENCE AND NON-RESIDENCE

Students who are minors are considered to be resident students if at the time of their registration their parents have been domiciled in the State of Maryland for at least six months.

The status of the residence of a student is determined at the time of his first registration in the University and may not thereafter be changed by him unless, in the case of a minor, his parents move to and become legal residents of Maryland by maintaining such residence for at least six months. However, the right of the minor student to change from a non-resident status to resident status must be established by him prior to the registration period set for any semester or session.

Adult students are considered to be residents if at the time of their registration they have been domiciled in Maryland for at least six months, provided such residence has not been acquired while attending any school or college in Maryland or elsewhere. Time spent on active duty in the armed services while stationed in Maryland will not be considered as satisfying the six-months period referred to above except in those cases in which the adult was domiciled in Maryland for at least six months prior to his entrance into the armed service and was not enrolled in any school during that period.

The word "domicile" as used in this regulation shall mean the permanent place of abode. For the purpose of this rule only one domicile may be maintained.

LIBRARY FACILITIES

The new \$2.5 million library building located in a prominent position at the west end of the main quadrangle was opened for service in January, 1958. The almost 200,000 square feet of floor space allow for greatly improved library service and accommodations for study. Two large reading rooms are air-conditioned for student convenience.

The building will ultimately house 1,000,000 volumes; it seats 2,000 readers. The 200 carrels and individual studies provide excellent facilities for graduate students and faculty.

Library facilities outside the main building include the Engineering and Physical Sciences Library located in the Mathematics Building and the Chemistry Library.

The University System of Libraries has in its collection 600,000 volumes, in addition to thousands of government publications and uncatalogued materials. Over 7,000 periodicals and 200 newspapers are received. The libraries are able to supplement their services to graduate students and faculty by borrowing material from other libraries through interlibrary loan.

UNIVERSITY BOOKSTORE

For the convenience of students, the University maintains a University Bookstore, located in the Student Union Building, where students may obtain at reasonable prices textbooks, stationery, classroom materials and equipment. The Bookstore operates on a cash basis.

INSTITUTE FOR TEACHERS OF MATHEMATICS IN JUNIOR HIGH SCHOOL

The Department of Mathematics of the College of Arts and Sciences with the financial support of the National Science Foundation is offering a six-week summer institute for junior high school teachers of mathematics to assist the teachers in improving the quality of teaching of mathematics.

N.S.F. AND N.D.E.A. INSTITUTES

The institute should also give the teachers a better understanding of current curricular developments and make it possible for them to interpret these developments for junior high school programs.

Participants of the institute who are graduate students in the College of Education may obtain graduate credit for the six hours of course work completed in connection with the Institute.

Mathematics 182—Introduction to Algebra, (3) and Mathematics 189—Summer Institute for Teachers of Science and Mathematics are required of each participant. For more information on the courses see the listings under the Department of Mathematics. In addition there will be a demonstration class in which experimental material for grades seven and/or eight will be taught. A seminar will provide for discussion of the materials in the demonstration class and associated teaching problems.

Financial assistance in the form of a National Science Foundation grant will be available to about 40 participants at the standard N.S.F. rate of \$75 per week plus \$15 per week for each dependent (to a maximum of four). This stipend will be tax free to students enrolled for credit toward a degree. A travel allowance of 4 cents per mile for a single round trip from the participant's home to the institute (to a maximum of \$80) will also be paid. All tuition and fee charges will be paid by the N.S.F. grant. Participants are expected to have had at least two years' experience teaching mathematics at the junior high school level and to have been appointed to a junior high school position for 1964-65.

Inquiries should be addressed to: Professor R. A. Good, Director, Summer Institute for Mathematics Teachers, Department of Mathematics, University of Maryland, College Park, Maryland.

INSTITUTE IN MATHEMATICS FOR ELEMENTARY SCHOOL TEACHERS, PRINCIPALS AND SUPERVISORS

A National Science Foundation grant has made it possible for the Mathematics Department of the College of Arts and Sciences to offer a six weeks summer institute in mathematics for elementary school personnel. This institute should provide a participant with the background necessary to understand and evaluate the current experimental programs in elementary mathematics being used in many communities over the country.

Two courses in mathematics will be required of each participant: Mathematics 181—Introduction to Number Theory (3), and Mathematics 183—Introduction to Geometry (3). Each lecture will be followed by a period of supervised study. A demonstration class will be offered, using experimental materials written for the fourth grade. Visiting lecturers will discuss with the participants techniques and procedures for meeting the needs of mathematics teaching in the elementary grades.

Financial assistance in the form of a National Science Foundation grant will be available to about 35 participants at the standard N.S.F. rate of \$75.00 per week plus \$15 per week for each dependent (to a maximum of four). A travel allowance of 4 cents per mile for a single round trip from the participant's home to the institute will also be paid. All tuition and fee charges will be paid by the N.S.F. grant. Participants who are graduate students in the College of Education may obtain graduate credit for the six hours of course work completed with the institute.

Inquiries should be addressed to: Dr. Stanley Jackson, Director, Summer Institute in Mathematics for Elementary School Personnel, College of Education, Skinner Building, University of Maryland, College Park, Maryland.

Institute activities are for the full day.

Enrollees will be secondary school counselors from the public and private non-profit secondary schools of Maryland and other states.* Tuition and other fees are exempted. Enrollees from public schools will receive a \$75 weekly stipend with a \$15 allotment for each dependent. Nomination of Maryland public school counselors will be through the superintendents' offices of the local systems. Secondary school counselors in Maryland private, non-profit schools, and in non-Maryland schools should apply to Dr. Margaret M. Bott, University Counseling Center, if interested in more information.

INSTITUTE FOR HIGH SCHOOL TEACHERS OF BIOLOGY

The Colleges of Agriculture, Arts and Sciences, and Education, and the National Science Foundation are cooperating to offer a program of courses designed for high school teachers of biology. These courses combine in various ways to enable high school teachers to improve their knowledge of the biological sciences and related material during an eight-week institute. Credit earned in the Summer Institute in Science for High School Teachers of Biology and in similar related science courses may accumulate up to one-half of the credit hours requirement for the Master of Education degree.

*Only holders of a master's degree will be eligible for the the 1964 Summer Institute.

Through the cooperation of the Department of Music, the College of Education, and University College, a workshop in music will be offered during the 1964 summer session. The regular procedures for admission to the University, listed elsewhere in this bulletin, apply also to the workshop.

The workshop, with its Band section directed by Clarence Sawhill, is offered during the period June 22-July 10. Participants will register for Mus. Ed. 155, Organization and Techniques for Instrumental Class Instruction, 3 credits, and will meet daily in afternoon sessions. The workshop will include lectures and demonstrations of all phases of instrumental teaching. Daily laboratory sessions will be held in connection with rehearsals of two bands composed of selected high school students.

In addition, there will be an opportunity to observe a selected high school chorus (in residence June 29-July 3), conducted by a nationally known

WORKSHOPS

choral director. The rehearsals of the chorus will also be open to all students enrolled in other Music or Music Education courses during the summer sessions. The chorus and the senior high band will give a joint concert on July 3.

Copies of a brochure containing detailed information about the workshop may be obtained by addressing the Department of Music. See page 8 for the applicable fees including registration, dormitory room, and supplementary fee.

WORKSHOP IN PHYSICAL EDUCATION—PE 189

The workshop offers professional assistance to teachers of physical education. A realistic foundation for physical education will be developed and related to modern programs. Individual and group problems will be given special consideration.

This workshop will meet from 8:30 a.m. to 12:00 noon and 1:00-3:00 p.m. daily for three weeks, June 22 to July 10. Six (6) credits, either graduate or undergraduate, are offered. In either case, the credits are counted as "content" for certification in Maryland.

WORKSHOP FOR TEACHERS OF SECONDARY SCHOOL ENGLISH

The College of Education, in cooperation with the departments of English, Journalism, and Speech, the Maryland State Department of Education, and the National Council of Teachers of English will sponsor a workshop for teachers of secondary school English.

The emphasis will be upon the concept of integration in the teaching of literature, composition, language, journalism, and speech through deeper insight into the humanities, through better acquaintance with the newer media of instruction, and through the development of new techniques and materials of instruction.

The workshop will be held from June 22 to July 10, from 10:00 a.m. to 3:30 p.m., Monday through Friday. Three (3) hours of credit may be earned. All workshop participants must be admitted to the University as special students or to the Graduate School as graduate students before June 1. Enrollment will be limited and preference will be given to teachers with two years or more of secondary school experience. Registration will be June 22.

All correspondence concerning application or information should be addressed to Miss Marie D. Bryan, College of Education.

WORKSHOPS IN SPECIAL EDUCATION

THE EDUCATION OF CHILDREN WITH LEARNING IMPAIRMENTS

This workshop will consider the theoretical background and the methods, curricula and materials employed in the approach to the various learning problems of children.

Opportunities for observation, participation and consultation in program planning, curriculum organization, and the use of methods and materials will be provided according to the primary learning problems involved: Mentally Handicapped (Educable), Mentally Deficient (Trainable), Pre-School Mentally Retarded, Perceptual Learning Problems, Disturbances in Emotional Development, and Motor Handicapped. Selected consultants will be utilized.

The workshop will meet off-campus daily from 9:00 a.m.-3:00 p.m., June 22 to July 17. Four units of undergraduate or graduate credit may be earned.

Students planning to attend the Workshop should request the Special Education Summer Session Brochure for program details from Dr. Jean Hebler, Program of Special Education, University of Maryland, College Park, Maryland.

TELEVISION WORKSHOP

Each summer the Department of Speech offers a television workshop (Speech 149—3 hours, see listing under Speech and Dramatic Art) which is primarily designed for the classroom teacher.

The workshop provides an opportunity to (1) learn the fundamental principles of instructional television, (2) to develop techniques of presentation, (3) to further develop professional skill and competence.

The air-conditioned studios in Woods Hall contain the latest in professional broadcast-type equipment.

Enrollment is limited. Inquiries may be sent to Professor George F. Batka, Director, Radio and Television, Department of Speech, University of Maryland, College Park, Maryland.

WORKSHOP IN PHYSICAL ACTIVITY IN RECREATION PROGRAMS FOR THE RETARDED

This is a cooperative workshop, with Recreation, Special Education, and the Joseph P. Kennedy, Jr., Foundation, collaborating. It will feature an exploration of the problems involved in programming, staffing, and skills instruction in the special recreation program for the mentally retarded child. Specific emphasis is placed upon training the prospective

WORKSHOPS

teacher and recreation leader of the mentally retarded in the methods and techniques of teaching recreational skills to the retarded. Valuable laboratory experiences involving working with the retarded in a Day Camp setting will provide students with practical problems in special techniques for the retarded child.

The workshop will meet daily, Monday to Friday, 9:00 a.m. to 3:00 p.m., June 8 through July 3. Amount of time spent in laboratory sessions will determine credit which can be obtained. Students must attend the complete morning session; full credit may be received only through completion of the entire daily program.

TYPEWRITING DEMONSTRATION FOR BUSINESS EDUCATION TEACHERS

The College of Education offers the business teacher registered during the summer session an opportunity to observe pupils at work in a typewriting class. These observations will aid the classroom teacher in: (1) designing purposeful classroom activities for developing basic typewriting skills, (2) planning with the pupil the organization of an effective set of "work" habits, (3) analyzing through case studies the methods of dealing with the various aspects of individual pupil progress, (4) applying the principles of the psychology of skills to the teaching of typewriting, and (5) developing improved methods for course construction, selection of instructional materials, and measuring pupil achievement.

COURSE OFFERINGS

An "S" before a course number denotes that the course is offered in Summer School only. An "S" after a course number indicates a regular course modified for offering during the summer session. A more complete course description may be found in the respective College catalogues.

The University may find it necessary to cancel courses when warranted, due to low enrollment. In general, freshman and sophomore courses will not be maintained for classes smaller than 20. Minimum enrollments for upper level undergraduate courses and graduate courses will be 15 and 10 respectively.
